Document Body

Kathy,

Your update on the Core WQS situation on this morning's conference call was very helpful, if dissappointing.

Bad River has not made a decision on what action the Tribe wants to pursue as the USEPA has not made a decision on what the options/action will be. We are considering tailored WQS if that is an option and if we are far enough ahead. In the long term, the Tribe intends to continue TAS/WQS as originally planned wether core promulgation occurs or not.

I am sending you the latest version of our WQS (I still have not been able to do any major work on it in the last two months). Take a quick look, don't tax yourself, and see if you think we may still consider tailored WQS if that is indeed an option.

PS-Do you know anything about our Wellhead Protection Plan QAPP, I haven't heard or gotten in touch with Felicia in the last couple of weeks. It looks like the USGS will not have our report done (past peer review, etc) until late Spring. We would be able to begin planning with the preliminary data.

Thanks,

Tracey Ledder
